

# ENVIRONMENTAL SHIP INCENTIVE

As part of efforts to promote sustainable development, Port of Pecém has implemented an incentive for environmentally sustainable ships. On March 10, 2020, the Port of Pecém started to offer a discount on Utilization of the Berthing Facilities Fee (item 1.2 on Pecém's price table) for ships with good environmental performance in terms of emission of atmospheric pollutants and CO<sub>2</sub>, that will be measured by Environmental Ship Index (ESI), and for Green Award certified ships.

Vessels with an ESI score larger than or equal to 30 points and smaller than 40 points will be granted a discount of 5% on Utilization of the Berthing Facilities Fee. Vessels with an ESI score of 40 points or more or Green Award certified vessels will be granted a discount of 10% on Utilization of the Berthing Facilities Fee. Discounts based on ESI or GA are not cumulative and the lowest possible discount will be grant to ships with both certificates.

In order to qualify for the discount, the shipping agent is responsible for contacting Port of Pecém and to make arrangements to claim the incentives. Shipping agents must attach documentation proving ESI scoring or GA certificate in the Porto Sem Papel (PSP) system. The Environment Department of Port of Pecém will examine the documentation and notify the Billing Department about the discount. Then, the Billing Department will issue the payment slip with discount.
